

The Degree Stack Audit

Four SeedStacking activities to make any degree AGI resistant

A degree was never the harvest. It was always the seed. This worksheet walks you through the three move Degree Stack from today's Daily Seed episode, one SeedStacking phase at a time. Work the phases in order. Each one builds on the last, and the Harvest phase produces something you can share with the community.

23%

wage premium for AI skills (WEF)

8%

premium for a bachelor's alone

25%

higher entry pay with AI skills (Randstad)

SEED

Price Your Own Premium

5 to 15 min

Open any AI chatbot and ask it the starter prompt below using your real degree and job. Then write down the three skills it names that you do not have yet. That gap list is your stack plan.

COPY-PASTE STARTER PROMPT

I have a degree in [your field] and work as [your role]. Based on 2026 labor market trends, which three visible AI skills would most increase my market value, and why?

Sprout and Grow

SPROUT**Run the Stack Audit**

15 to 20 min

Score yourself 1 to 5 on each layer of the Degree Stack below. Be honest. A 3 or lower on any layer tells you exactly where to invest this month.

STACK LAYER	SCORE 1 TO 5
Foundation: completed credential or in progress	<input type="text"/>
Visible AI skill: named tool you can demonstrate	<input type="text"/>
Verification: certificate, badge, or portfolio proof	<input type="text"/>
Public compounding: shared work in the last 30 days	<input type="text"/>

GROW**Stack One Visible Skill**

20 to 30 min

Pick the lowest scoring layer from your audit. Choose ONE free, verifiable starting point and complete the first module today. Examples: Google AI Essentials, the free Gemini Beginner course in the Harvest Kernel portal, or a tool specific certificate in your field. Log your choice and your 30 day finish date below.

HARVEST

Publish Your Stack Map

30 to 45 min

Turn your audit into a one page Stack Map: your degree at the base, the AI skill you are stacking now, and the proof you will show. Write it below, then post a photo or summary of it in the Wins and Harvests space in the community. Teaching your plan in public is the move that compounds. Tag it #DegreeStack so other members can find it.

The article gives you the what. The community gives you the how.

Share your Stack Map, get feedback from Professor Dean, and keep stacking with educators and professionals building real AI fluency.
